No Repeat Prescription Fee

£135 /Month

Inclusive Of Appointments And Medicine

£4.43 /Day

Inclusive Of Appointments And Medicine

Patients can access free treatment monitoring via the UK Medical Cannabis Registry and understand how medical cannabis may impact different aspects of your health.

The registry, the first of its kind in the UK, was set up as recommended by NHS England and captures essential data including how effective the medicine is at treating your symptoms and any side effects you develop.

Medical Cannabis

Medical cannabis, legalised for private prescription in the UK in November 2018, can be safely prescribed by specialist doctors at Sapphire Medical Clinics for a vast range of conditions where there is clinical evidence for the use of medical cannabis.

Did you know?

- Cannabidiol (CBD) and tetrahydrocannabinol (THC) are the two main compounds within the cannabis plant. Both can be prescribed safely by doctors at Sapphire Medical Clinics.
- Medical cannabis is now manufactured in the UK
- Unlike over the counter CBD, medical cannabis contains consistent levels of THC, CBD and other cannabinoids
- Treatment is monitored within our patient registry and is more affordable than ever before
- All of this can be done via the safety of your own home

Sapphire Medical

Sapphire Medical Clinics is the first Medical Cannabis clinic registered by the Care Quality Commission (CQC) and offers consultations for a wide range of conditions including paediatric neurology, pain, psychiatry and dermatology.

As a multi award-winning medical cannabis clinic, treatment at Sapphire is focused on providing patients with the best available personalised medical care delivered by world renowned specialists, adhering to the highest level of clinical governance.
